

COMPLETE+ SUPERIOR WOOD PRESERVER

- All in 1 product for the eradication and treatment of woodworm and wood boring insects.
- Protects against wood rotting and wood staining fungi (including blue stain), wet rot, dry and wood boring insects.
 - Available in 8 colours.
 - Low Odour Solvent Based. HSE/BPR Approved.
 - A Superior wood preservative.
 - Water repellent

By the end of 2016 our previous Bird Brand Complete Wood Preserver will lose it's HSE approval due to the new Biocidal Product Regulations and new registration requirements affecting all wood preservatives. When compared the new Complete + product is superior in many ways including:

- An additional active ingredient (IPBC) that controls/prevents blue stain fungi.
- Contains resins and other wood stain ingredients that give a higher build/brighter decorative finish particularly on smooth timbers.
- Higher levels of active ingredients.
- Low odour solvent.
- Better suspension of colour pigments throughout the tin.

General Description

Bird Brand Complete + Superior Wood Preserver contains 3 active ingredients that are effective against wood destroying and wood discolouring fungi as well as against wood boring insects. The clear colour can be overpainted with a full range of top coat products. It can be used on sheds, fences, log cabins, decking, facias and any outdoor timber where a strong decorative colour and premium chemical protection are required.

Apart from 'CLEAR' the colours are not generally suitable for over painting, staining or varnishing after application. It has a very low odour solvent and is ready to use. Complete+ is HSE approved for use on all outside contact wood, which is not in direct contact to soil or surface water but for structures including e.g.: facades, windows (inner and outer parts), exterior doors (inner and outer parts) but not directly indoor application. We recommend using pre-treated timber if to be in ground or surface water contact.

Chemical Information /HSE Approval Information

	% w/w
Component	,
PERMETHRIN	0.06
3-IODO-2-PROPYNYL-N-BYTYL CARBAMATE	0.70
TEBUCONAZOLE	0.30

WOOD PRESERVATIVE FOR AMATEUR, PROFESSIONAL AND INDUSTRIAL USE AGAINST WOOD ROTTING FUNGI INCLUDING DRY ROT AND WOOD DESTROYING INSECTS. FOR USE ON EXTERNAL TIMBERS OUT OF GROUND CONTACT AND SURFACE WATERS. This product is approved under The Control of Pesticides Regulations 1986 (as amended) for use as directed. HSE No. 10009/ PCS IRELAND 98524.

Preparation

FOR BEST RESULTS - PREPARATION Shake well before and during use. Ensure timber is dry and free from dust/dirt and any surface coating including paint or varnish. Clean weathered and dirty wood and allow to dry. Where necessary sand down smooth softwood and wipe over lightly with Bird Brand White Spirit before application. Where timbers are suffering from decay, before applying Wood Preserver, remove all decayed wood and replace with sound, treated timber.

If the timbers are green from algae growth, remove by first using **Bird Brand Algae Killing Fungicidal Wash**. The green stain should disappear within a day resulting in a better finish. To remove the grey denatured condition, apply **Bird Brand Decking & Garden Furniture Restorer**. For a stronger satin finish that is water repellent, we recommend **Bird Brand Complete Decking Oil**

Application and Coverage

Complete+ Superior Wood Preserver is best applied by brush.

Apply 2 even coats covering all faces, sides and joints, paying particular attention to the end grain which should be treated to saturation.

The coverage rates below are approximate and will vary depending on condition.

Application Rate:

Planed/smooth timbers = 8 m²/litre per coat Rough sawn timbers = 4 m²/litre Dipping Rate: 1 m /35 litres

CLEAN UP

Remove as much product as possible from equipment prior to cleaning. Clean brushes, sprayers and any splashes/spillages with Bird Brand Paint Brush Cleaner, White Spirit or EcoSpirit.

Drving Time

Wood Preserver dries in 48-72 hours but may vary with temperature, relative humidity and absorbency. The odour may linger for longer and timber products should not be used until the smell has disappeared completely and is dry in all areas. Be certain to ensure there is no residue remaining to stain clothing/articles when putting item to use.

Precautions

Avoid fluid and vapour contact with bitumen products, felt, mastics, tar, rubber, plastic, masonry or plastic type materials which may soften and disrupt. Apply again to any surfaces cut after treatment. Do not allow this product to reach aquatic environments, the ground or the sewer system. Protect environment (e.g. soil, plants, aquatic environment) from splashes. Please read statutory conditions and HSE precautions before use.

Do not spray in confined spaces where a harmful and flammable build up of vapour could occur. Do not spray where contact with electrical lights or any other potential sources of ignition could occur.

HAZARDOUS TO BEES. DO NOT USE ON BEEHIVES OR BEEKEEPING EQUIPMENT.

3-IODO-2-PROPYNYL-N-BYTYL CARBAMATE is a carbamate compound which has weak anticholinesterase activity. DO NOT USE if under medical advice not to work with anticholinesterase compounds.

As the manufacturer cannot know all the uses its products may be put to, it is the users responsibility to determine suitability for use. If in doubt contact our company or specialist contractors for advice.
