## **CLEAN UP**

Clean up with soap and water. After clean up be sure to flush spray equipment with solvent to prevent rusting following manufacturers instructions

## **REDUCTION**

Reduce up to 20% with water as required by application equipment.

**SURFACE PREPARATION**  
Surfaces to be painted must be in sound condition. Use in accordance with good painting practice. Remove oil, grease and flaking material. Treat powdery surfaces with Water Based Stabilising Solution.

Steel:- Remove all loose rust, peeling paint, other loosely adhering contaminations per SSPC SP2. Hand tool cleaning. Remove any contamination before applying subsequent coats of material. Prime base steel with an appropriate anti-corrosive primer.

Concrete Block and Masonry:- Surfaces should be thoroughly clean and dry, with mortar and concrete aired for a minimum of 30 days @ 24oC. All loose mortar or other contaminants should be removed prior to application of any coating material. Surface temperatures must be at least 12oC before filling. Use appropriate filler for cracks or imperfections. Allow to dry thoroughly before top coating.

### **PREVIOUSLY PAINTED SURFACES**

If in sound condition, clean the surface of all foreign material. Glossy surfaces must be rubbed down to provide a key. If paint is peeling or badly weathered, clean to sound substrate and treat as new.
